

1. Lottery

Setting	Pairs and plenum
Goal	Getting to know the group. Exchange of pension options
Material	Presentation cards and pens Flipchart
Duration	15 minutes
Further information	By collecting information on the flipchart, you get a first impression of which pension products are already known.

The participants form groups of 2. They exchange views on the following question:

"Suppose you have won 100,000 euros in the lottery! What would you do with it?"

Each group discusses the question and writes down the most important results (one result each on a moderation card).

The moderation cards are then presented with the results and collected on a flipchart.

The results are clustered according to the following topics:

- Expenditure/Purchases
- Provision
- Other

The results are then discussed and possibly rearranged.
